

## Product sheet

### ZR SHA type Mobile Compactor

Gate-chain (according to EN DIN 30720) and "small hook" type collection vehicle

Compactor of capacity from 6 to 14 m<sup>3</sup>

The double compactor collection system is the primary advantage of ZR SHA type mobile compactor. This versatility enables full utilisation of collection vehicles held by a disposal company. ZR-SHA type mobile compactor is dedicated to compacting the volume of waste and cardboard materials, foil and dry or semi-dry municipal waste. A very strong structure guarantees long period of operation of the compactor without the need for general overhaul. The small dimensions of the device allow to place it in areas with little available space. A gate-chain system or "small hook" system allows to place the machine in areas lacking the manoeuvring space for the "big hook" collection vehicle. Thanks to its dimensions the machine can be placed in enclosed premises such as underground car parks or underground delivery zones.

## ZR type Mobile Compactor

### ZR type compactor models

Machine type	Container capacity [m <sup>3</sup> ]
ZR 6 SHA	6
ZR 8 SHA	8
ZR 10 SHA	10
ZR 12 SHA	12
ZR 14 SHA	14

### Machine parameters and standard accessories:

Collection vehicle	Gate-chain according to DIN EN 30720 and "small hook"
Motor	5.5 [kW]
Connection	32 [A] 6h
Operating Voltage / Protection in the facility	400 [V] / 50 [Hz] / 25 [A] group C
Pump / pressure	21 [L/min] / approx. 300 [kN] at 180 [bar] (2.42 [kg/cm <sup>2</sup> ])
Silent pump used	Yes
Oil temperature and level sensor.	Yes
Information on filling level	preliminary and full (light signalling)
Time of one cycle	33 [s]
Volume per one stroke	1.10 [cbm]
Volume per hour	120 [cbm]
Loading chute - top	1450 x 1550 [mm]
Loading chute - bottom	950 x 1550 [mm]
Height of chute edge	1510 [mm]
Pressing chamber floor	Made from increased durability metal sheets. Thickness 8 [mm].
Pressing chamber walls	Made from increased durability metal sheets. Thickness 8 [mm].
Guiding of the pressure plate	Adjustable on self-lubricating polyamides.
Access to space behind the pressure plate	Three inspection hatches.
Rear door	Mounted on top hinges.
Front rollers	None
Rear manoeuvre hook	None
Cover above the loading chamber	One-piece or two-piece (opened to left and right side)
Paint layer	primer 60µm, lacquer 60µ according to RAL pallet

Zentex Sp. z o.o. reserves the right to change these parameters.

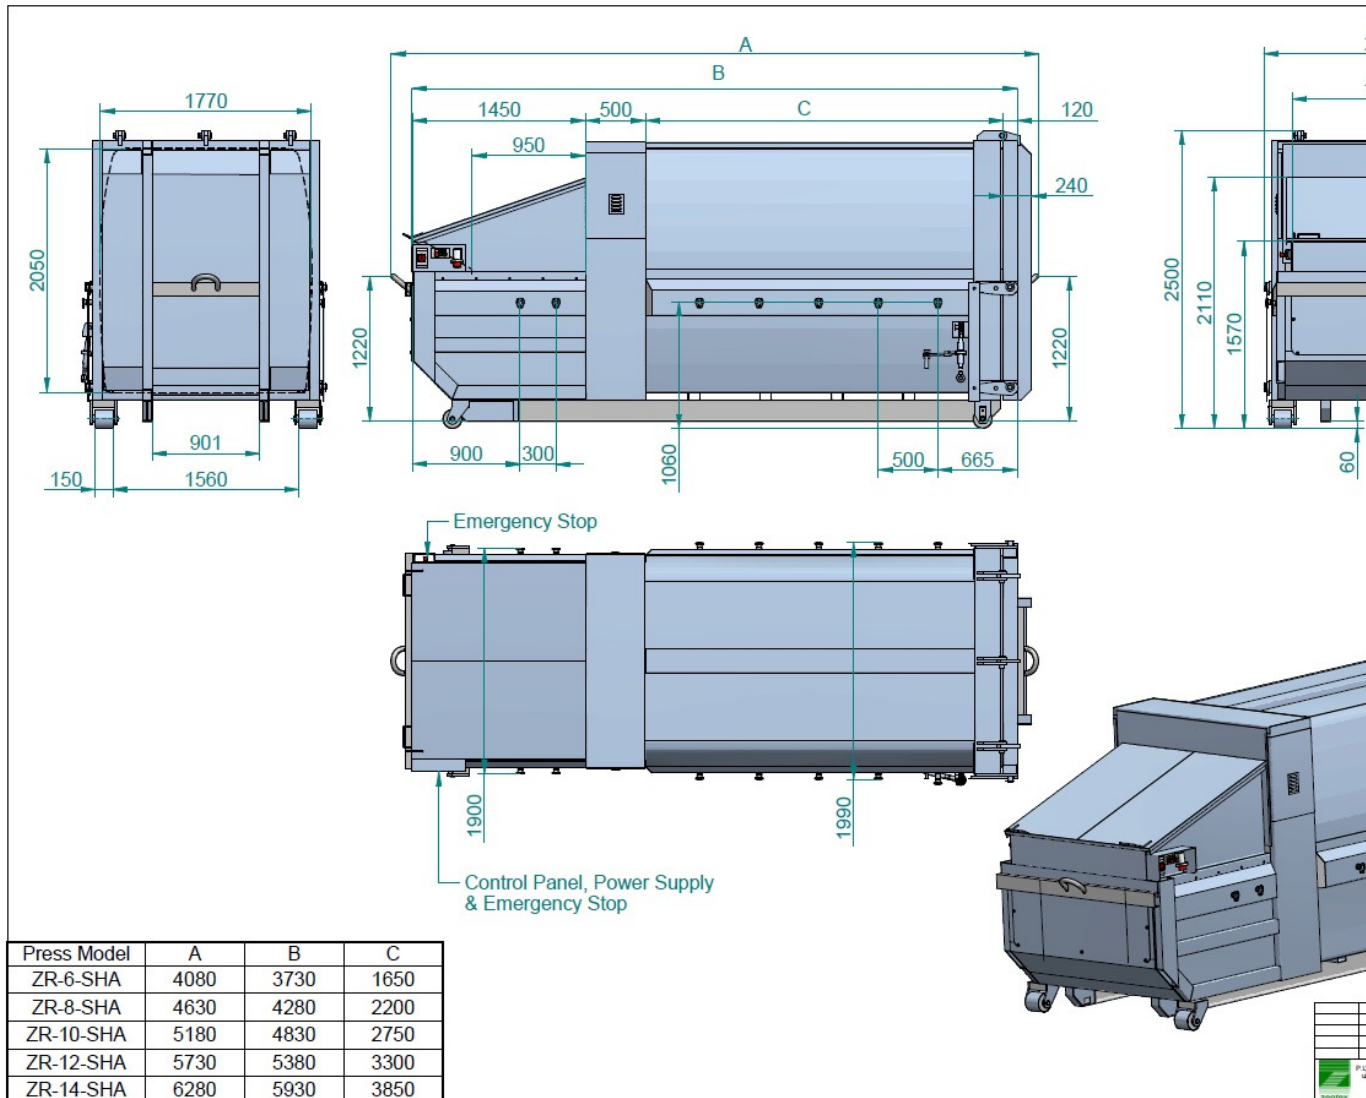

The machine has certificate
